SUMMARY

Backend Software Engineer with experience building scalable microservices and AI-driven platforms. Expertise in Python, Node.js, React, AWS, and PostgreSQL/MongoDB, delivering high-performance APIs and robust CI/CD pipelines. Proven ability to integrate AI/ML capabilities and optimize system architecture for enterprise applications.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frameworks: FastAPI, Node.js, Express.js, React.js, Next.js, Django

Databases: PostgreSQL, MongoDB, Redis, pgvector, Elasticsearch

DevOps & Infra: AWS, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Kafka

AI/ML & Data: LLMs, Semantic Search, Embeddings, RAG, OpenAI API, Langchain

Tools: Git, Playwright, Claude Code

EXPERIENCE

Software Engineer at Mercor

Django · FastAPI · Next.js | 07/2024 - Present | Remote, San Francisco

- Optimized candidate profile microservice with FastAPI and parallelism, reducing latency from 2s to 200ms (10x improvement).
- Enhanced AI matching engine for 4M+ profiles using embedding strategies and targeted filters.
- Developed end-to-end Work Trials platform, automating payments, expiration, and workflows to scale to 5,000 trials/week.
- Migrated email service to Kafka-based async architecture, eliminating request blocking for 10,000 emails/request.

Founding Engineer at Dugout

Node.js · Express.js · React.js | 06/2023 - 06/2024 | Hybrid, Telangana

- Designed and maintained Express.js backend serving 250+ daily active users across 200+ API endpoints.
- Implemented Redis caching to optimize infrastructure, improving API response times by 200%.
- Managed full AWS backend infrastructure, establishing production and development CI/CD pipelines via GitHub Actions.
- Built user chat backend end-to-end in 2 weeks, boosting engagement 40% with new features like Highlights and Polls.

Backend Developer (Part-time) at Pentadots

Node.js · Express.js | 11/2023 - 06/2024 | Remote

- Developed 100+ REST APIs for a real estate platform, including JWT authentication and email/phone verification services.

Research Intern at IIT Jammu

Python · Raspberry Pi · DSP | 05/2023 - 07/2023 | Jammu, India

- Built piezoelectric sensor array data acquisition system; improved throughput 20% via multithreading on Raspberry Pi.

PROJECTS

ApplyPilot - End-to-End Autonomous Job Application Pipeline

FastAPI · Next.js · Playwright · PostgreSQL · LLMs

- Built end-to-end pipeline that discovers, scores, tailors, and auto-applies to 50+ jobs daily across LinkedIn/Indeed/Greenhouse.
- LLM-driven fit scoring with per-JD resume/cover-letter tailoring; Playwright agents submit applications hands-free.
- Scheduled concurrent workers with Telegram approval flow and Next.js dashboard for real-time review.

Resumatch - AI-powered Resume-JD Matching Engine

FastAPI · Next.js · Docker · pgvector · Claude API

- Developed AI-powered resume-JD matching engine using semantic similarity (pgvector) and LLM cross-encoding reranking.
- Implemented skill gap analysis pipeline classifying skills with confidence scoring and batch processing.
- Integrated multi-strategy authentication (JWT, Google OAuth2) with user-scoped data isolation.

Huego.ai - Medical RAG Chatbot

AWS · FastAPI · TypeScript · Docker · Next.js

- Deployed medical RAG chatbot over 1,000+ pages of literature on AWS with FastAPI backend and Next.js UI.
- Containerized the application with Docker, streamlining deployment and development workflows.

EDUCATION

NIT Hamirpur, B.Tech ECE, CGPA 8.22, 2020-2024
