

Priyanshu Gupta

AI Engineer 2

priyanshuraja456@gmail.com | +917590082188 | <https://www.linkedin.com/in/priyanshugupta546/>

SUMMARY

AI-Native Engineer with full-stack capabilities, specializing in building and deploying AI applications and RAG pipelines. Expertise in LLM integration, system design, and optimizing ML serving infrastructure for high-performance AI solutions.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Frameworks: FastAPI, Node.js, Express.js, Next.js, React.js, Django

Databases: PostgreSQL, pgvector, Redis, MongoDB

DevOps & Infra: AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Kafka

AI/ML: LLMs, RAG, Embeddings, Semantic Search, OpenAI API, Langchain

Tools: Git, Playwright, Claude Code, MCP Servers

EXPERIENCE

Software Engineer at Mercor

Django · FastAPI · Next.js | 07/2025 - Present

- Re-architected candidate profile service to FastAPI, reducing API latency by 90% (from 2s to 200ms) through parallel processing.
- Optimized AI matching engine for 4M+ profiles by implementing advanced embedding and reranking strategies.
- Developed and deployed a talent marketplace connecting leading AI research labs with specialized candidates within one week.
- Engineered a fault-tolerant asynchronous email service using Kafka, scaling throughput to 10,000 emails/request and eliminating bottlenecks.

Founding Engineer at Dugout

Node.js · Express.js · React.js | 06/2024 - 06/2025

- Designed and maintained an Express.js backend, supporting 250+ daily active users across 200+ API endpoints.
- Delivered an end-to-end user chat backend within two weeks, increasing user engagement by 40% through new interaction features.
- Optimized API response times by 200% by integrating Redis caching into the backend infrastructure.
- Managed AWS backend infrastructure and established production-grade CI/CD pipelines using GitHub Actions.

Backend Developer (Part-time) at Pentadots

Node.js · Express.js | 11/2023 - 06/2024

- Developed over 100 REST APIs for a real estate platform, including JWT authentication and secure verification flows.

Research Intern at IIT Jammu

Python · Raspberry Pi · DSP | 05/2023 - 07/2023

- Engineered a data acquisition system for sensor arrays, improving processing efficiency by 20% using multithreading on Raspberry Pi.

PROJECTS

Resumatch - AI-powered resume-JD matching engine

FastAPI · Next.js · Docker · pgvector · Claude API

- Developed an AI-powered resume-job description matching engine using semantic similarity with pgvector and LLM cross-encoding for reranking.
- Implemented a skill gap analysis pipeline, classifying skills with confidence scores and supporting batch processing.
- Designed multi-strategy authentication (JWT, Google OAuth2) with user-scoped data isolation for secure access.

Huego.ai - Medical RAG chatbot

AWS · FastAPI · TypeScript · Docker · Next.js

- Containerized the application using Docker, streamlining deployment and improving efficiency.
- Built and deployed a medical RAG chatbot on AWS, processing 1,000+ pages of literature with a FastAPI backend and Next.js UI.

EDUCATION

NIT Hamirpur, B.Tech ECE, CGPA 8.22, 2020-2024
